\*\*Total TVA Fuel Cost - TVA calculates and applies the Total Fuel Cost Adjustment monthly and adds or subtracts a per kilowatt-hour charge to recover generating fuel costs when those costs exceed or are below the amount budgeted. The Total Fuel Cost can fluctuate up or down depending on how actual fuel costs compare to TVA's projected expenditures.

A graphic with a dark blue background on the left and a green background on the right, separated by a white dashed vertical line. On the left, the text "75% of rates pay for wholesale power from TVA" is written in white. On the right, a dark green rounded rectangle contains the text "DREMC Operations" in white.
